

Wascott Area Community,

For many years, the Wascott Community Club/Fire Department Auxiliary (WWC/FDA) has been collecting and recycling aluminum cans from the small building next to the Stop a Sec Store. It is located on the corner of "T" and Crystal Lake Road.

The monies collected are then donated to the Northwood School students through many programs:

- Back to school supplies

- Backpack Program

- Winter wear

- Adopt a family at Christmas

- Tiny Seeds (infant & toddler)

- 2 - \$1,000 scholarships

This year we also donated to 2 food shelves and CASDA for a total of over \$7,000.

Will you consider bringing your aluminum cans to our building and being a part of this project? We would like them in plastic bags that are tied. We are sure that by getting this information out to our community that we can increase our collections/donations. The price per pound of cans is low at this time. It fluctuates throughout the year. So, more cans would be helpful.

Thank you in advance for considering being a part of this program.

The WCC/FDA
